

ENVIRONMENTALLY FRIENDLY FLY FISHING GEAR & ACCESSORIES

Mission

Loon Outdoors is singularly focused on environmentally friendly fly fishing products that stand up to the rigors of the most demanding angler. We will make the fly fishing experience more enjoyable for both the novice and the expert by providing innovative, superior products that make us all better fisherman. We will always make our products from environmentally friendly ingredients that allow us to help preserve the waters that we hold so dear.

FLOATANTS

AQUEL

Say "ahh kwel" premium gel, the French formula. Loon's biggest seller. Premium gel floatant for long lasting dry-fly floats. A silicon-based, temperature-stable floatant that won't melt when it's hot or harden when it's cold. 1/2 oz.

PRODUCT TIP:

Apply floatant to fly, then use your fingers to work floatant into the body and hackle of the fly. For best results coat your fly with Aquel, then shake in Top Ride fly dryer and floatant for the highest and longest float possible. Try some and find out why people who fish for a living use Aquel.

ROYAL GEL

A gel floatant with added iridescence that matches the shimmer given off by clear-winged insects and improves tracking visibility of the fly. Temperature-stable. 1/2 oz

FLY SPRITZ 2

Loon's earth friendly alternative to our original Fly Spritz. This is the WORLD'S ONLY water-based spray floatant, a formula we worked on for several years! Simply spray your fly, and either wait or false cast to dry and continue catching fish. Finally, a spray floatant which is safe for the environment. 1 oz.

PRODUCT TIP:

Apply a couple of squirts to your fly, then you can either blow or false cast your fly dry.

CADDIES

SMALL CADDY

New and improved with the "Secure-Top" design, the Small Caddy guarantees you will never lose a bottle of floatant. Simply unscrew the top off of your Aquel, slide the bottle into the elastic loop, fold the "Secure-Top" attachment over the neck of the bottle, and rescrew on the cap. Your floatant will be hanging upside down, always ready to use. Holds 1/2 oz. bottle of Aquel, Royal Gel, or Henry's Sinket.

BOTTOMS UP

Rubber suction cup with snap fastener and chain for 1/2 oz. bottle of Aquel, Royal Gel, or Henry's Sinket.

SINKETS

DEEP SOFT WEIGHT

Non-lead reusable weight putty. Made with non-toxic tungsten safe for unsuspecting waterfowl. Deep Soft Weight won't crimp your tippet or hang up in rocks like split shot. Try Deep Soft Weight once and you'll never use anything else again.
25 grams

PRODUCT TIP:

On hot days you can place the product container into the stream to "firm up" Deep Soft Weight to a desirable consistency. On cold days you can keep the container close to your body so it can remain pliable. Don't leave the product on your leader after you are through fishing as it can warm up and stain vests or other articles. Stays put best if placed over a knot. Select depth by positioning on your leader. Select size depending on current strength. Place in front of act as a bead head.

BRASS HEAD SOFT WEIGHT

Like Deep Soft Weight, but brass colored for attraction. Make your own bead head nymphs on-stream. 25 grams

INDICATORS

BIOSTRIKE

Biodegradable high float strike indicator putty for wet flies and small dry flies. Available in orange, yellow, pink 50/50 pink yellow. 1 oz.

PRODUCT TIP:

For best results, wet fingers before handling Biostrike. Form a football shape piece on a section of dry leader or line. Stays put best if applied at a leader knot. Helps you follow dry flies as well. Try a series of different colors to help visibility in varying light conditions. Remove at the end of the day and place in container, as it is reusable.

BIO-GLOW

Glow-in-the-dark Biostrike! Catch more fish at night with the Bio-Glow strike indicator. Charge with the UV Mini Lamp or UV Power Light and in seconds your strike indicator is glowing bright. 1 oz

CLEANERS

FLY LINE CLEANER - SCANDANAVIAN FORMULA

Designed specifically for our fellow fly fishermen in Scandinavia, this phenomenal product is now available worldwide. Simply add a few drops to your Line Tool or FastCast Line Cleaning tool and pull your line through for the ultimate in fly line cleaning and dressing. Do not use on sinking lines. 1 oz

LINE SPEED

Positively the best line cleaner, conditioner, and UV block for fly lines. Treated lines cast farther and last longer. Cleans your line, fills in imperfections, makes it slicker, and protects against the sun. Does not leave a sticky, dirt gathering silicone fluid coating like most line cleaners. Shelf life of this product is one year. 1 1/4oz.

PRODUCT TIP:

For best performance, let Line Speed cure on your line overnight before buffing off with a clean, soft towel.

STANLEY'S ICE OFF PASTE

A non-toxic antifreeze paste for lines and guides to keep them from freezing. Effective to 12 degrees below freezing. Apply Stanley's to your line and guides with fingertips or a clean cloth. It won't hurt you or your equipment as it is completely safe and environmentally friendly. Reapply as necessary depending on weather. It works. Just ask any Midwestern winter steelhead fisherman. 1/4 oz.

PRODUCT TIP:

Apply Stanley's Ice Off Paste to the line and the guides with finger tips or clean cloth. Reapply about every twenty minutes of fishing time depending on the weather.

LUBRICANTS

REEL LUBE

A combination of synthetic lubricant, solid lubricants, and water repellent to give fly reels protection from rust and friction. Excellent protection for firearms as well. 1/2 oz.

PRODUCT TIP:

Apply liberally to all moving parts. With tight areas, apply Reel Lube with a dubbing pick.

STREAM LINE

Cast further easier with Stream Line. Stream Line is a combination fly line lubricant and floatant. Water-based, so it is safe to use right on the water. 2001 Fly Rod & Reel Selected Products. 1/2 oz.

PRODUCT TIP:

Apply Stream Line with a rag, or for better results, try our Fast Cast Line Cleaning Tool that attaches to your rod. You can even do this streamside right before your next cast.

GEAR

REEL CASE

Protect and organize your fly reels in this completely adjustable Reel Case. Holds eight reels with room for extra stuff. Dimensions: 12x11 in.

GEAR BAG

Reels, fly boxes, lines, tippets, leaders, hats, clothes, sunscreen, and whatever else you carry around with you while fishing all has a new home. The Loon Gear Bag has it all. On the inside: seven mesh pockets, two closable, with room to spare. On the outside: two padded zippered end pockets, three zippered side pockets (one with padding). Shoulder strap and four non-slip feet included. Dimensions: 23x10 in.

RIP TIDE

Taking the Flak Jacket to the next level was inevitable and the Rip Tide Chest Pack is the result. Keeping the design around innovative twin working platforms, the Rip Tide Chest Pack fully encloses them while adding more storage space. In the interior, you'll get two large storage pockets in each padded compartment with removable fly storage. Outside, two pockets, tippet dispensers, and two retractable clips for tools and floatant per pouch. Each of the pouches inside offers three pockets for storage. On the back, enough storage for everything else you could possibly need, complete with hydration, and a D-ring for nets. Designed to fit all sizes, the Rip Tide Chest Pack has adjustment straps on the front, sides, and shoulders.

STILLWATER PACK

A mini back pack and chest pack combined into one. Sleek design streamlines your gear in a comfortable, easy to use creation. Frontside has two zippered compartments (one with the Loon Outdoors working platform) for fly boxes and other stuff, with two built-in retractors for tools. The backside is a single zippered storage compartment for anything else you might want to bring along. With an internal clip for keys and an external D-ring for your net. Completely adjustable shoulder and side straps make it perfect for everyone.
